

Oramed Granted Key European Patent for Platform Technology in Oral Delivery of Proteins

January 5, 2022 at 7:30 AM EST

- **Protease inhibitor is a key component of Oramed's PODTM technology that protects therapeutic proteins in the digestive system**
- **Oramed has already been granted this patent in the United States and Japan**

NEW YORK, Jan. 5, 2022 /PRNewswire/ -- Oramed Pharmaceuticals Inc. (Nasdaq/TASE: ORMP) (www.oramed.com), a clinical-stage pharmaceutical company focused on the development of oral drug delivery platforms, today announced the European Patent Office has granted the Company a patent titled "Protease Inhibitor-Containing Compositions, Compositions Comprising Same, and Methods for Producing and Using Same." The patent supports Oramed's oral protein delivery platform technology which underlies its lead drug candidate ORMD-0801 now in pivotal Phase 3 studies and positioned to potentially be the first oral insulin capsule on the market. The granted patent covers a unique method for the purification of raw protease-inhibiting materials which are a key component of the platform technology that protects therapeutic proteins in the digestive system.

"With this newly granted patent, we now have 88 patents granted and 35 more pending, further fortifying Oramed's leading position with respect to intellectual property assets addressing the oral delivery of therapeutic proteins currently only available via injection," stated Oramed CEO Nadav Kidron.

About Oramed Pharmaceuticals

Oramed Pharmaceuticals (Nasdaq/TASE: ORMP) is a platform technology pioneer in the field of oral delivery solutions for drugs currently delivered via injection. Established in 2006, with offices in the United States and Israel, Oramed has developed a novel Protein Oral Delivery (POD™) technology. Oramed is seeking to transform the treatment of diabetes through its proprietary lead candidate, [ORMD-0801](#), which is being evaluated in two pivotal Phase 3 studies and has the potential to be the first commercial oral insulin capsule for the treatment of diabetes. In addition, Oramed is developing an oral GLP-1 (Glucagon-like peptide-1) analog capsule ([ORMD-0901](#)).

Forward-looking statements: This press release contains forward-looking statements. For example, we are using forward-looking statements when we discuss the expected timing of topline results of our Phase 3 studies or the potential of ORMD-0801 to be the first commercial oral insulin capsule for the treatment of diabetes. In addition, historic results of scientific research and clinical trials do not guarantee that the conclusions of future research or trials will suggest identical or even similar conclusions. These forward-looking statements are based on the current expectations of the management of Oramed only, and are subject to a number of factors and uncertainties that could cause actual results to differ materially from those described in the forward-looking statements, including the risks and uncertainties related to the progress, timing, cost, and results of clinical trials and product development programs; difficulties or delays in obtaining regulatory approval or patent protection for our product candidates; competition from other pharmaceutical or biotechnology companies; and our ability to obtain additional funding required to conduct our research, development and commercialization activities. In addition, the following factors, among others, could cause actual results to differ materially from those described in the forward-looking statements: changes in technology and market requirements; delays or obstacles in launching our clinical trials; changes in legislation; inability to timely develop and introduce new technologies, products and applications; lack of validation of our technology as we progress further and lack of acceptance of our methods by the scientific community; inability to retain or attract key employees whose knowledge is essential to the development of our products; unforeseen scientific difficulties that may develop with our process; greater cost of final product than anticipated; loss of market share and pressure on pricing resulting from competition; laboratory results that do not translate to equally good results in real settings; our patents may not be sufficient; and finally that products may harm recipients, all of which could cause the actual results or performance of Oramed to differ materially from those contemplated in such forward-looking statements. Except as otherwise required by law, Oramed undertakes no obligation to publicly release any revisions to these forward-looking statements to reflect events or circumstances after the date hereof or to reflect the occurrence of unanticipated events. For a more detailed description of the risks and uncertainties affecting Oramed, reference is made to Oramed's reports filed from time to time with the Securities and Exchange Commission.
